## **BOIL WATER ORDER LIFTED FOR WARNER UNIFIED SCHOOL DISTRICT WATER SYSTEM**

***Test Result Shows Total Coliform Bacteria Absent in Drinking Water Supply***

The County of San Diego, Department of Environmental Health (DEH) has lifted the Boil Water Order for the Warner Unified School District Water System located at 30951 Highway 79, Warner Springs, CA 92086 effective immediately.

The drinking water system had tested present for total coliform bacteria and absent for *E. coli*. Total coliform bacteria can come from soils and other sources in the environment and can indicate a problem with the water supply system. The Boil Water Order was issued to ensure all water used is free from contamination. The distribution system has been disinfected by a Certified Operator and follow-up water samples confirm the absence of bacteria in the water supply.

*For more information regarding the water system contact Tom Vargas at (760) 782-3517.*
